Catchment, Stormwater & River Management

18 August 2008

BOSS International
6300 University Avenue
Madison, WI 53562 USA

Attention: Peter J. Arnold: Account Manager

Dear Peter

StormNET Urban Runoff Modelling Software

With regard to the above urban runoff modelling software, I confirm that we have evaluated it and are satisfied that the software's SWMM5-based analysis and reporting format would be acceptable to us for use by consultants employed on Cape Town City Council stormwater projects where SWMM5-based modelling is specified.

Kind regards

Rod Arnold
For Manager: Catchment Stormwater and River Management Branch
Roads and Stormwater Department
City of Cape Town
